

→ **broaden the view** with a virtual tour

- **Dramatically increase the prospect of selling**
- **Increase your marketing potential**
- **Win new instructions**
- **Stand out from the competition**

Marketing your seller's property with our technology can **dramatically increase the prospect of selling** their home, especially when considering many buyers begin their property research on the internet.

Further reports have found that internet users tend to physically view fewer properties before buying: eight on average compared with fifteen if they do not use the internet at all.

## what is a virtual tour?

A virtual tour is a series of 360 degree panoramic images, viewed on the web, they carry you through the space and layout of a property's interior and exterior.

A virtual tour is the next best thing to physically visiting a property.

## why use virtual tours?

Virtual tours are a unique way to market your properties, win instructions and stand out from the competition.

Web visitors are easily able to access the virtual tours and can use on-screen icons to comprehensively view all aspects of each chosen property. An additional optional feature is an integrated floor plan, which provides further clarity on the property layout for the user.

For the seller, this new technology is rapidly becoming a modern marketing tool. It provides valuable on-line exposure and is a perfect way to promote sales.

For the buyer, it is a quick and convenient way to access a property, before deciding upon an on-site visit.

## why use frisbee photos?

Frisbee Photos is the first Sussex based company to offer virtual tours as a marketing service.

We provides an all-in service from initial organisation to capture, processing, hosting, distribution and technical support. With Frisbee Photos you have no contracts to sign, no equipment to buy, no training of staff and no set-up costs.

We will liaise with the vendor/landlord to organise a suitable day/time to visit the property to do the photography and floor plan draft.

The virtual tour is then produced and floor plan drawn up and supplied all usually within 24 hours.

## client testimonials:

We have used virtual tours to support the marketing of our properties for a number of years. The service provided by Frisbee Photos has been both efficient and of a very high standard.

**Simon Pattenden**

Director of Sales, Massey Property Services

We have worked with Frisbee Photos for over three years now and are very impressed with the level of service we receive. We have found that using virtual tours on our properties greatly improves the marketing of the property and also helps win new instructions for both rental and sales.

**Graham Shipp**

Director, Property Moves
